Certificate Outlook PKI Setup E-Mail

Lösung (öffentlich)

This guide describes how to integrate a personal certificate for signing and encrypting emails in Microsoft Outlook for macOS. To do this, you need a certificate, which must be available as a .p12 file.
[1]How do I request a personal certificate?

Please note the information on [2]Email Encryption.

- [3]Import your personal certificate into the macOS keychain.
- Open Microsoft Outlook.
- Open "Settings" in the menu bar under "Outlook".
- Select the "Accounts" entry.
- Select your TUD mailbox from the list of accounts and go to "Advanced..." in the detailed view.
- In the "Digital signing" and "Encryption" sections, select the "Certificate" drop-down list. Select your certificate, which is named after your first and last name.
