Cisco Softphone VoIP WebEx telephone

Lösung (öffentlich)

Answering or starting a call - Selecting an end device Example: Entering numbers using the dialpad

Clicking on "Calls" takes you to the usual telephone keypad where you can start a call.

Now open the menu at the top right and select the desired device.

If the call is not made via your softphone, click on "Disconnect" on the connected device. Webex will now run on your computer again. The end device can still be used as usual, but the Webex software will no longer use it (in the sense of a headset). Screenshot CISCO WebEx: Disconnecting the end device
