Matrix Server

Lösung (öffentlich)

Home server tu-dresden.de If the home server address "tu-dresden.de" is not accepted by Element Desktop, please delete the program's cache. Replace <user> in the following paths with the account name (your login name) of your operating system.

Linux: /home/<user>/.config/Element/Cache

or

/home/<user>/.config/Riot/Cache

macOS: With the Finder open, select "Go to" in the menu bar, then hold down the Option key and go to the "Library" entry. Then navigate to the folder "Application Support", "Element" (for older installations "Riot") and delete the cache folder there.

/Users/<user>/Library/Application Support/Element/Cache

or

/Users/<user>/Library/Application Support/Riot/Cache

Windows: You can either copy the path below with your account name into the address bar of Windows Explorer or navigate there manually, but you must have enabled the display of hidden folders and files in Explorer.

C:\Users\<user>\AppData\Roaming\Element\Cache

or

C:\Users\<user>\AppData\Roaming\Riot\Cache
