Schlüsselwörter

VoIP telephone

Lösung (öffentlich)

The Conference Phones Cisco CP-8832/CP-7832 are meant for conferences with multiple participants using a hands-free equipment (conference rooms).

Cisco CP-8832 front view

-

Graphic monochrome display for calls, status messages, soft key functions etc.

-

Softkeys; offer context-dependent functions for different status of the device

-

Mute: deactivates the phone's microphone

-

Navigation cluster. Used to navigate menus by pressing "up" or "down". The center button is used for accessing the selected menu points

-

Volume: regulates the volume of the speaker/receiver

-

Number pad for dialing phone numbers or number codes

Cisco CP-8832 back view

-

USB-C-Port to adapt Ethernet and power supply (PoE)

-

Connector for two additional microphones

-

MAC-Address and serial number (used in case of malfunctioning)

-

Label with device characterization

For operating instructions, please refer to the [1]FAQ "Operating the Cisco CP-7841 standard VoIP phone". The end devices usually differ only slightly.
