Overleaf ShareLaTeX GIT

Lösung (öffentlich)

Since version 4.0, a GIT connection has been available for the on-premises versions. Instructions for use are available online at [1]Overleaf. To use the connection, you need to generate a token in the [2]Overleaf/ShareLaTeX interface, which is used as a password for GIT access. [3]Instructions are also available for this.
[4]Synchronization with a GitLab or GitHub server is currently not possible with our on-premises server.
