Lösung (öffentlich)

Backup of Groupdrives

Backups are only set up automatically for Groupdrives with the usage purpose Category Institute, Project, and Publication Data. A backup of the Groupdrive is taken once a week.

Backups for other types of Groupdrives are not officially supported by us. In this case, you are responsible for backing up your data yourself.

Users do not have access to the backup. It is primarily intended as a safeguard on our part (e.g., total failure of the storage system). For everyday use, [1]Snapshots should be used.

Restrictions

Only files and directories with valid UTF-8 encoding are backed up. Files and directories containing special characters or using other encodings are generally excluded from backup.

If possible, follow the rules outlined in [2]Guidelines for File Names to ensure that your files are backed up. These guidelines also apply to directories.
