Feature Overview

Email ✓

Encryption -

Calendar ✓ (Google Calendar)

In this guide, you will learn how to set up a TU Dresden email account in Gmail for Android. You can then send and receive emails and view your calendar.

Setup

The instruction was carried out on a Google Pixel 4a with Android 11.

The Gmail app was used, which is pre-installed on most Android smartphones. If you don't have it, you can download it here:[1]Gmail

- Open the Gmail app and click on "Add an email address".

Screenshot Android Set up email
- Now click on "Exchange and Office 365".

Screenshot Android "Set up email" providers
- Enter your "mail address" (depending on the ending, only @tu-dresden.de or @mailbox.tu-dresden.de) and then click on "Set up manually".

Screenshot Android Email address input
- Now enter the following data and then click on "Next".

- E-mail address: firstname.surname@tu-dresden.de
- Password: Your password
- Client certificate: -
- Domain name: user\zih-login
- Server: msx.tu-dresden.de
- Port: 443
- Security type: SSL/TLS

Screenshot Android Email configuration settings
- Your account has now been added.

Screenshot Android Email success message

Note on the integration of calendars with Android:

Access is also possible via Davmail.

To access the Davmail gateway, a CalDav Connector app is required (for a fee, via Playstore). [2]example configuration
