Terminalserver

Lösung (öffentlich)

Print

Printing is done through the on-campus print system, local printers are not available. Your document is available at all public printers through your campus print card.

Session settings

- Individual changes to programs as well as files stored on the desktop or in the document folder are retained/saved at most until 4:15 of the next day
- At 4:15 all logged in users are logged out
- Separate sessions are ended after 2 hours
- The limit for an active session is 12 hours
- If there is no interaction by the user the session will be disconnected after 2 hours of idle time

Save

Your local disks and printers are not available in the session - use the H:\ drive to save your data.

H:\ is your home drive.

You can reach the drive via the <datafile> icon placed on the desktop.

When copy/paste between the local PC and the terminal server session, there is the restriction that you can only copy and paste text. Images, files and other information cannot be cut or copied and pasted. These restrictions will be pointed out to you at least during the first copy operation:

If you want to leave the session only for a limited period of time (e.g. lunch break), it is recommended to disconnect the session instead of logging off. When you log back into the session after the break, you can immediately continue working with all open programs and windows.
