virtual machine VM ISO

Lösung (öffentlich)

Requirements: VMWare Remote Console

- [1]Windows

- [2]Linux

Linux:

-

Click on "Virtual Machine" in the upper left corner of the window.

-

Now select "Removable media", then "CD/DVD drive 1" and then click on "Settings".

Screenshot of the VMWare Remote Console start window.

-

On the right-hand side of the menu under "Device status", activate the two options "Connected" and "Connect on power-up".

-

Under the item "Connection", select the following options:

-

"Location": Remote Server

-

"Use remote ISO image:" Enable.

Now click on "Browse..." at "Use remote ISO image:":

Screenshot of the VMWare Remote Console VM settings.

Double-click on the folder "[ISO-Share]" in the opened folder browser.

Screenshot of the VMWare Remote Console ISO image settings.

-

Now select the desired ISO file and confirm the selection with "OK".

-

Save the changes by clicking on the "Save" button.

Windows:

-

Click on "VMRC ▼" in the upper left corner of the window.

Now in the drop-down menu that opens, first select "Removable media", then "CD/DVD drive 1" and then "Settings".
