### Schlüsselwörter

Apple Certificate Email Mail PKI Setup

### Lösung (öffentlich)

-  
Click the file (PKCS12 format) that contains the key and the certificate.

- Screenshot certificate

Select "login" for keychain and click "Add".

- Screenshot macOS: installation window

When prompted for the certificate password, enter the password and click "OK".

- Screenshot macOS: password request

-  
After the installation you will be redirected to the Keychain Access. There you can see the certificate you just installed under "My Certificates".
