Cisco Jabber Softphone VoIP WebEx telephone

Solution (public)

Ideally, you should save all contacts in the local phone book of the softphone client and also in the phone book of the smartphone in E.164 notation, e.g. +49172123456 or +4935146312345. The internal TU contacts can also be saved in this way. Both the smartphone and the softphone client can cope with this perfectly.
