Solution (public)

For the automated setup of Adobe Acrobat, the settings file can also be distributed via group policy. The manual way can be found in the [1]linked FAQ article.

The following values must be set via GPO to store the corresponding URL in Adobe and to obtain the security settings from it.

Path:
HKCU\SOFTWARE\Adobe\Adobe Acrobat\2020\Security\cDigSig\cCustomDownload

Depending on the version of Adobe installed, the path must be adjusted accordingly.

For Adobe Acrobat Reader DC this is:
HKCU\SOFTWARE\Adobe\Adobe Acrobat\DC\Security\cDigSig\cCustomDownload

Settings:
(DWORD) bLoadSettingsFromURL = 1
(DWORD) bAskBeforeInstalling = 1
(REG_SZ) tLoadSettingsURL =
<https://tu-dresden.de/cids/scd/ressourcen/dateien/cert/adobe-acrobatsecuritysettings>

Note: For existing installations or if the settings have not been set correctly, an update must be initiated manually: Adobe Settings Update
