Solution (public)

Setting up a ditributed Mailbox (vpf) in Apple Mail (on iOS and iPadOS)

Open "Settings", go to "Apps", and then go to "Mail".

Go to "Mail Accounts", then click "Add Account".

Screenshot Apple Mail:
Mail Accounts selection Screenshot Apple Mail: add account

Now enter the email address of the distributed mailbox in the format:
name-des-vpf@msx.tu-dresden.de and click "Next" (in the upper-right corner).

Screenshot Apple Mail: naming

Select "Add Other Account" and then "Mail Account".

Screenshot Apple Mail: account type Screenshot Apple Mail: account selection

Enter the following information, then tap "Next":

Name: firstname lastname (optional)

Email: name-des-vpf@msx.tu-dresden.de

Password: password of your own ZIH login

Description: msx.tu-dresden.de (optional)

Screenshot Apple Mail: settings I

Now enter the additional information and confirm by clicking "Next".

in the "Incoming Mail Server" section:

Host Name: msx.tu-dresden.de

Username: user\YourZihLogin\name-des-vpf

Password: passwort of your personal ZIH login

in the "Outgoing Mail Server" section:

Host name: msx.tu-dresden.de
