ZIH-Login

Solution (public)

If you are unexpectedly unable to log in to any ZIH service using your existing password, your ZIH login may be locked due to a security incident. This is often the case if, for example, phishing emails have been sent from your address or other activities indicate that your password has been compromised.

In such cases, please contact the [1]Service Desk directly. There you will be informed of the steps required to unlock your ZIH login.
