Login Sharepoint

Solution (public)

After the [1]migration from SharePoint 2013 to SharePoint 2019, the login method for users changes from Shibboleth to NTLM.

Login via web browser

After calling up the [2]SharePoint website, a login dialog opens to request the login data. This dialog does not appear on the web page itself, but is displayed by the web browser used. For a successful login you need as

Firefox, Chrome etc.

- Login name: your ZIH login
- Password: your ZIH password

Login dialog in Firefox

Microsoft Edge (Windows)

- Login name: "user\zih-login"
- Password: your ZIH password

Login via Microsoft Office

If you want to open a document from SharePoint in Microsoft Office, you must also log in to the Office program. For a successful login you need as

- Login name: "user\zih-login"
- Password: your ZIH password

Logging in via Microsoft Office to access a document in SharePoint
